

Scheduler Release Notes

December 2020

R72

This document contains detailed descriptions of release notes for the release date/month shown above, as well as explanations of resolved issues.

Release Information

Release Dates

There will be a System Release taking place on the following dates and times for the following servers. System downtime for each respective release can be expected during the maintenance windows:

- **EU Server** – December 1, 2020 at 11:00pm - 3:30am GMT
- **POD 60** – December 1, 2020 at 11:30pm - 4:00am EST
- **U.S. Server POD2** – December 2, 2020 at 11:30pm - 4:00am EST
- **U.S. Server POD4** – December 9, 2020 at 11:30pm - 4:00am EST
- **U.S. Server POD5** – December 9, 2020 at 11:30pm - 4:00am EST
- **U.S. Server POD3** – December 10, 2020 at 11:30pm - 4:00am EST
- **U.S. Server POD6** – December 10, 2020 at 11:30pm – 4:00am EST
- **AUS Server** – December 10, 2020 at 12:00am - 4:30am AEDT

Supported Operating Systems and Browsers

The table below shows currently supported operating systems and browsers.

NOTE: The list shown in the table below are operating systems we support, though they may not be actively tested.

Platform	OS Version		Browser	Version
Desktop			Internet Explorer	11
Windows	7, 10		Microsoft Edge	latest
Mac	10.13.4 (High Sierra)		Google Chrome	latest
Mobile			Mozilla Firefox	latest
iOS	11.4.1 -> latest		Safari	latest
Android	6.0.1-> latest			

Enhancements

We are listening! Enhancements marked with the light bulb icon are a direct result of IDEAS submitted in Community. Visit Community Ideas, upvote the best items, and keep the feedback coming!

The following enhancements have been added to this release.

Added Monthly and Weekly Schedule Overview Pages

WFR-196701, WFR-196700: In a previous release, the *Schedule Overview (Monthly)* and *Schedule Overview (Weekly)* pages were deprecated. Going forward, these two pages will be available in Desktop, under *Team > Schedule > Schedule Overview (Monthly)* and *Team > Schedule > Schedule Overview (Weekly)*.

Added Checkbox Multi-Select Option and Edit Button for Mass Edit in Summary By Employee Report

WFR-173867, WFR-173868: In Desktop, the Mobile App, and the Mobile Version on Desktop, in the *Summary By Employee* report, checkboxes are now available for you to select multiple shifts. When selected, you have the option to mass delete by clicking the *Delete* button at the top of the report. In addition, there is an *Edit* button available, which will display a *Manage Shift* pop-up window. From the *Manage Shift* window, you can apply edits to the date, time, cost center, skill, etc. for the selected shifts all at one time.

NOTE: Constraint violations will not prevent the updates from saving but will be flagged as a violation after the save.

MSCC and SCC Widgets – Search

WFR-193184, WFR-193183: In the Mobile App and the Mobile Version on Desktop, a search bar has been added to the *Scheduled Cost Center* and *Managed Scheduled Cost Center* widgets in the Employee Profile. This will help users with a large number of cost centers to quickly search for what they need.

Replaced Time Frame for Total Hours on Time Off Display on Schedules (Bulk Type Only)

WFR-173847: Previously, time off displayed on schedules as a timeframe (i.e. 12a-8a) for a full day or partial day (bulk) time off. This could be confusing to managers, as it indicated the employee was only off during those hours but may be available outside those hours.

What's new: Time off hours that do not have a defined start and end time will now display the total amount of hours taken off instead of a timeframe.

Time Off Hours in Schedule Hours Calculation

WFR-187276: Previously, for time off in schedules, the time off was included by default in the scheduled hours, which caused issues such as the time off being included in total hours, as well as visually misrepresenting the scheduled hours in the schedule views.

What's new: You can now choose whether to include time hours off in schedules. From the *Time Offs* page (*Company Settings > Global Setup > Time Offs*), in the *Time Off Properties* widget, a setting is available to enable within the *Settings* section, *Include Time Off in Scheduled Hours*. This setting will control if time off should be taken into calculation for total hours on schedules and reports and will reflect visually in the schedule views.

Weekly Schedule by Daily Rule Available in Mobile Version on Desktop

WFR-199256: The *Weekly Schedule (By Daily Rule)* report is now available in the Mobile App and the Mobile Version on Desktop, under *Team > Schedule > Team Schedule View > Weekly Schedule (By Daily Rule)*. Edit actions in the report will be available in a future release.

Bug Fixes

The following issues have been resolved in this release.

Availability/Preferences: *Par* Translation Should Have Been *Au*

WFR-186203: For French language users, on the *Availability/Preferences* and *My Availability/Preferences* pages, labels with the inaccurate translation *Par* now display *Au*.

Basic Scheduling: Grouping by Scheduled Cost Center Displayed Three Items Per Cost Center

WFR-187857: On the *Weekly Schedule* report, when users filtered for a day and grouped by Scheduled Cost Center, the report displayed three items per cost center. This is fixed, and in this situation, each cost center displays one item, as expected.

Basic Scheduling: PDF and HTML Downloads Displayed Empty Column

WFR-196087: In *Daily Schedule* reports, the *Employee Schedule* column sometimes displayed as empty in PDF or HTML downloads. This is fixed, and PDF and HTML downloads of the report display the correct data in the *Employee Schedule* column.

Employee Data: *Primaire* was Incorrectly Translated to *Nom*

WFR-186184: For French language users, the *Primaire* column label in employee profiles was incorrectly translated to *Nom*. This is fixed, and the column is now labeled *Primaire*.

Employee Data: *Mobile* and *Rendre Mobile* were Inconsistently Used

WFR-201376: For French language users, the column name *Mouv* is now changed to *Mobile* and the action *Flottant* is now changed to *Rendre mobile* to be consistent with other French translations in the system.

Reports: Users Could Not Add Schedules Report to Dashboard

WFR-200095: Users with the correct access rights to the *Schedules* report (*Advanced Schedules > Schedules*) can add it to their Dashboard as expected. Previously, users sometimes received a *Could not find report* error.

Reports: *Summary By Employee* Report Displayed Employee Records More Than Once

WFR-205518: On the *Summary By Employee* report, when the *Day Part* column was not displayed, employee records sometimes appeared more than once in the report. This is fixed, and now no duplicate records display when *Day Part* is not included.

Schedule: Schedule Did Not Display Time in 24 Hour Format

WFR-201440: In a *View By Day* schedule, when a user's locale was set to display time in 24 hour format, the time displayed in AM/PM format. This is fixed, and the *View By Day* schedule now follows the user's locale time format, as expected.
